

Unstoppable Value サービス×パーツで今を支え、未来へつなぐ

Service × Parts — Keeping Your Production Moving Today and Into the Future.

お客様の生産を支える

定期点検 Periodic inspection

設備が故障してから対応する時代から、故障を未然に防ぐ時代へ。定期点検によって機械の状態を把握し、部品交換やメンテナンスを計画的に実施することで突発的な停止リスクを低減します。生産計画を守り、設備の寿命を延ばし、トータルコストを最適化する。定期点検は「設備を守る」だけでなく「お客様の生産を止めないための価値」と考えます。

We are moving from an era of reactive repairs after equipment failure to an era of proactive prevention. By monitoring machine conditions through periodic inspections and carrying out scheduled part replacements and maintenance, we reduce the risk of unexpected downtime. This approach ensures production schedules are met, extends equipment lifespan, and optimizes total costs. We view periodic inspections not merely as a way to protect equipment, but as a means of delivering value by ensuring your production never stops.

安定した部品供給 Stable supply of parts

「必要な部品を、必要な時に、必要な場所へ」豊富な在庫、効率的な物流、そしてデータに基づく需要予測。統計的手法を活用した在庫管理により、お客様の生産を止めない部品供給を実現しています。止まらない生産を、確かな供給で支える。

“Delivering the right parts to the right place at the right time”—we achieve this through extensive inventory, efficient logistics, and data-driven demand forecasting. By utilizing statistical methods for inventory management, we ensure a steady supply of parts that keeps our customers’ production lines running without interruption. We support uninterrupted production with reliable supply.

24時間Web受付 Online inquiries accepted 24-hours a day

24時間の問い合わせ受付で、早朝、夜間でも問い合わせの受付が可能。営業時間外でも、写真や動画で状況連絡ができるため翌営業日にスピーディな対応が可能。いつでも、どこでもお客様のタイミングで問い合わせ受付が可能。そのため、お客様の問題解決に迅速に対応できます。Web受付が「止まらないサイクル」を支える。

With 24-hour inquiry acceptance, requests can be submitted early in the morning or late at night. Even outside business hours, customers can share photos or videos of the situation, enabling a speedy response on the next business day. Because inquiries can be made anytime, anywhere, and at the customer's convenience, issues can be resolved quickly. Web-based intake supports this “uninterrupted cycle.”
